

DAIS ANTISCALE

DAIS ANTISCALE is a synthetic water-soluble polymer designed to limit the formation of calcium and magnesium based scales in swimming pools. **DAIS ANTISCALE** is recommended for use with any pool surface. **DAIS ANTISCALE** is also useful for inhibiting scale from forming on salt water cell chlorinators. The polymer used in **DAIS ANTISCALE** has been approved by the Department of Environment for use in swimming pools and potable (drinking) water.

DIRECTIONS FOR USE:

POOL SIZE	DOSE
Up to 50,000 Litres	1 x 5 Litre Bottle
50,000 - 100,000 Litres	2 x 5 Litre Bottles

Wait until the pool is at least half filled with water. Pre-dilute the required dose in 10L of water, then "broadcast" across the pool surface. The level of scale should be monitored and if concentrations are high, further additions added at weekly intervals of 500ml lots maybe required. For more detailed information refer the product data sheet.

FIRST AID:

If poisoning occurs, contact a doctor or Poisons Information Centre on 131 126. If swallowed, do NOT induce vomiting. Give glass of water. If skin contact occurs, remove contaminated clothing and wash skin thoroughly. If irritation persists, consult a doctor. If in eyes, hold eyes open, flood with water for at least 15 min and see a doctor.

STORAGE:

Store away from other chemicals and food. Do not mix with other chemicals.

SPILLS:

Any spills should be absorbed with sand or soil and recovered into a drum. Wash the area thoroughly with water afterwards. *A Material Safety Data Sheet is available for this product.*

DISCLAIMER:

To the extent that it is lawful we exclude all warranties implied by law and limit our liability to the cost of replacing the product. Rainbow Pool Products has no control over the storage or use of this product and therefore does not accept any liability or responsibility in this regard.
