

PAL LED OPTICS RGB EXTRUDED IP68 STRIP LIGHT		
PAL LED Optic RGB Strip Light	DESCRIPTION	CODE
 Fitted with 20m of supply cable and a wall fitting	20 metre Roll of PAL-LED Optic RGB Flexible Extruded IP68 Strip Light	42-PLO-P-RGB-20K
	30 metre Roll of PAL-LED Optic RGB Flexible Extruded IP68 Strip Light	42-PLO-P-RGB-30K
Flexible Extrusion 	Extrusion to suit IP68 Extruded RGB Strip Light	42-PSFE-LP

NOTE: This RGB Strip Light must be powered by our PAL LED Optic PCR-200 Driver. The PCR-200 Driver can operate as a standalone system from remote or Wi-Fi or alternatively can be integrated to work in tandem with a PCR-4 PAL Touch System.

PAL LED OPTICS DRIVER & PCR-4 DRIVER FOR PAL LED OPTICS STRIP LIGHT		
PCR-200 DRIVER (IP65)	DESCRIPTION	CODE
 All PCR-200 drivers are supplied with 1 x PCT-1 Hand Held Remote	PCR-200 DRIVER FITTED WITH 10A SUPPLY LEAD & PLUG WITH PCT-1 HAND HELD TRANSMITTER & WI-FI READY BUT NOT FITTED	42-PCR-200
Note 1: The PCR-200 is suitable to drive up to 30m of PAL LED Optic RGB Extruded Strip	PCR-200 DRIVER FITTED WITH 10A SUPPLY LEAD & PLUG WITH PCT-1 HAND HELD TRANSMITTER & FITTED w/- PCW-1 WI-FI MODULE	42-PCR-200W
SPARE PCT-1 TRANSMITTER for Wireless Control 	SPARE PCT-1 HAND HELD TRANSMITTER w/- WALL HOLDER Supplied with 2x 1.5V Batteries	42-PCT-1
SPARE WI-FI MODULE KIT for Wi-Fi Control from Apple IOS or Android Devices 	SPARE WI-FI MODULE KIT	42-PCTWF1

1. Locate the best position to take the 20mm PVC Conduit back to the PCR-200 Driver to run the supply cable from the start of the PLO-P RGB LED Strip (NB: 20m Supply Cable connected to PLO-P)
2. At the selected location for the "PLO-P start" leave a path above the pool wall below where the coping will be laid to run the 20mm conduit from the PLO-P cable gland assembly. To enable simple installation of the PLO-P Gland Assembly and 20mm Conduit run back to the Driver the WF-3P Wall Housing is supplied. The PLO-P Gland Assembly and 20mm Conduit will fit into the WF-3P Wall Fitting as shown in figure 2.
3. The PLO-P mounting track should be laid when the pool wall finish is completed and the pool coping is laid (apart from the coping above the location of the conduit entry to the PLO-P cable gland).

It is suggested that a draw wire be fitted into the 20mm conduit to enable a simple installation of the PLO-P supply cable to the PCR-200 Driver.

FIGURE 1

FIGURE 2

4. When the PLO-P mounting track is fixed to the pool wall the PLO-P LED strip should be carefully fitted into the mounting track at the start of the PLO-P with the supply cable fitted into the 20mm conduit as shown in Figure 2. After the cable entry is fitted into the conduit the roll of PLO-P can then be laid out and carefully clipped into the mounting track making sure the PLO-P strip is not twisted or stressed. The mounting track can be fixed to the pool wall using good quality silicon or with the 316 mounting screw set available with the PLO-P mounting track.
5. When the PLO-P is laid into the mounting track the end (finish), the PLO-P has to be cut (**only cut the PLO-P strip at the cutting points shown with the dotted lines**).
NOTE: If the PLO-P is cut outside the cutting points it will cause a bank of 3 LED's to not illuminate.
6. After cutting the end (Finish) of the PLO-P use silicon to fit the end cap to the PLO-P then clip into the track.
7. Full installation instructions on the mounting track including fitting the track to corner and curved surfaces are provided on publication number P40-22A.

Mounting Track Details for Corners and Curved Surfaces

STRAIGHT CORNER (SIDE VIEW)

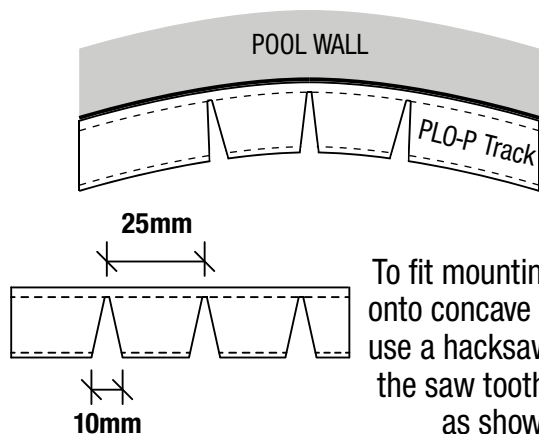

CURVED CORNER (SIDE VIEW)

To fit mounting track into corners use a hacksaw to cut the saw tooth detail as shown

CONCAVE SURFACE (SIDE VIEW)

To fit mounting track onto concave surface use a hacksaw to cut the saw tooth detail as shown

CONVEX SURFACE (SIDE VIEW)

To fit mounting track onto convex surface use a hacksaw to cut the saw tooth detail as shown

PAL LED OPTICS PCR-200 DRIVER

The PLO-P is powered by the PAL PCR-200 Class 2 LED Driver that is controlled with the PCT-1 Wireless transmitter or optional Smartphone App on Apple or Android Devices.

Refer to PCR-200 for Detailed Installation Instructions.

PCR-200 Driver

PCT-1 Transmitter

Refer to PCT-1 Information Sheet for Full Operation Details & Features

PCT App

Refer to Wi-Fi Information Sheet for Full Operation Details & Features

INSTALLATION INSTRUCTIONS ON THE PAL LED OPTICS PLO-P RGB PERIMETER STRIP LIGHT CONTROLLED BY PAL COLOUR TOUCH WIRELESS REMOTE SYSTEM

FEATURES

- ☐ Easy to Install
- ☐ Can be used in new or existing installations
- ☐ Aquatic - Can operate in or out of water
- ☐ All Moulded Construction
- ☐ Approved to IEC/AS/NZ 61347
- ☐ Long Life LED Construction
- ☐ Almost unlimited Colour Selection with just a Touch

PAL LED Optics Perimeter

RGB LED Light System with Touch Control to provide Perimeter Pool Lighting.

FEATURES:

Approved to IEC/AS/NZ

RF Control

Wi-Fi Control- apps available

Colour touch & switch modes available

PAL System Link

Cuttable

IP68 Flexible Extrusion

PAL LED Optics Perimeter

Colour Control

Control colour, speed, brightness and modes

Wireless Touch

Wi-Fi tablets and smartphones

Colour Touch Technology

Memory Recall

Remembers last colour, speed and brightness

Auto Sync

Automatic sync of your PAL lights every time

APPLE OR ANDROID DEVICES

Operating dist: 50 - 70metres

RF HANDSET

Part No: PCT-1
Operating dist: 50 - 70metres

RECEIVER/DRIVER

Part No: PCR-200
200watts / 12volts DC
Wi-Fi and RF
Approved to IEC/AS/NZ

PLO-RGB

Part No: PLO-RGB
5 watts per metre
12V DC
50,000 hours

ACCESSORIES

Mounting
Extrusion

System Link

Allows you to link multiple systems for home and pool automation

PAL LED Optics Perimeter ACCESSORIES PART NUMBERS

Description	Code
PAL LED OPTICS RGB EXTRUDED IP68 STRIP LIGHT	
30 metre roll of PAL-LED Optic RGB flexible extruded IP68 strip Light fitted with 20m of supply cable and a wall fitting	42-PLO-P-RGB
Extrusion to suit IP68 Extruded RGB Strip Light	42-PSFE-LP
PAL LED OPTICS PCR-200 DRIVER FOR PAL LED OPTICS STRIP LIGHT	
PCR-200 Receiver/Driver class 2 power supply with PCT-1 hand held transmitter, wall holder & Wi-Fi ready but not fitted	42-PCR-200
PCR-200 Receiver/Driver class 2 power supply with PCT-1 hand held transmitter, wall holder & fitted with PCW-1 Wi-Fi module	42-PCR-200W
Spare PCT-1 hand held transmitter w/- wall holder Supplied with 2x 1.5V Batteries	42-PCT-1
Spare Wi-Fi module kit	42-PCTWFI
