Laminar Jets

Mini Jets

Deck Jets

Powerstream

Zodiac Powerstream Water Feature

The Zodiac Powerstream is a low maintenance water feature that can be easily installed on any type of swimming pool or landscape garden. This water feature is compact and discreet, available in standard sizes, or can be custom designed in a variety of sizes to suit your specifications.

They are available in a clear option providing your pool with a luxurious finish whilst also allowing your water feature to blend into any landscape, surface or colour scheme.

Zodiac Mini Jets

Zodiac's Mini Jets are extremely versatile, suitable for most swimming pool environments and requiring minimal water flow. The all new flow control Mini Jets allow you to create the optimum flow to suit your pool, simply adjust the nozzle via a special tool included with the unit to modify the direction and length of water.

Zodiac Deck Jets

Zodiac Deck Jets create shimmering arcs of water from your deck into your pool or spa. The jets can be installed in almost any combination, and since they can be adjusted 360°, the dazzling effects they create can be changed again and again to meet your expectations.

Zodiac lives in the backyards of Australian families, at home in the pool. Zodiac began and continues with a dedication to innovation and new product development, focused on ensuring a better way of life. Our products deliver solutions to take the hassle out of owning a pool. So, all that's left is for you to enjoy it; to enjoy a better life.

Zodiac Laminar Jets

Zodiac's New Laminar Jet Water Features with LED lighting provide clear or coloured arcs of water as they silently enter your swimming pool or spa adding that extra touch of excitement to your backyard.

Zodiac Laminar Jets can be installed in both existing and new pool and spa applications and come standard with a built in 12-volt LED light module offering an extensive range of different colour combinations to create the perfect backyard oasis.

Handy Tip

The amount of water flow that is required to achieve the effect you desire will impact the position of the water feature. The way the water feature is plumbed will also have a significant impact on the water flow and therefore the performance of your water feature. Choose a location that's away from wind and sun, reducing water evaporation. Also avoid any underground cables and lines that may be running under your yard.
