

# twister<sup>®</sup>

power steering for your pool cleaner

**TWISTER** power steers your pool cleaner to completely clean your pool without getting stuck in corners.

twister<sup>®</sup>

- Simple to install, fits to your existing pool hose
- Suits all suction cleaners with swivel hose connection
- Steers pool cleaner out of corners
- Allows random, thorough pool cleaning
- "Twin-Track" continuous drive technology

**Problem:** Many suction cleaners get stuck in corners, others constantly follow a repetitive pattern around the pool. Either way, you end up with a dirty pool.

**Solution:** Simply install Twister. Twister continually changes the direction of the hose – power steering your pool cleaner out of awkward corners to ensure a constantly random and thorough cleaning pattern.

## How does Twister work?

Twister is powered by the constant flow of water through the pool cleaner hose and will counter-rotate the hose about 3 times per hour. A unique Angled Adaptor (included) is fitted between the pool cleaner and the hose. The counter-rotation of the hose causes the adaptor to continually change direction, freeing your pool cleaner from corners.
