## Waterco Heater Controller

Waterco's Heater Controller provides fully automatic control of a heater pump providing water flow to pool heat pumps or gas heaters when installed on pool hydraulic suction and return lines independent from filtration.

### Features

- Combined filter pump and heater pump control unit.
- Thermostatically controls conventional heaters on independently plumbed heating circuits.
- Heater pump off overnight timer
- Two filter pump timers
- Safe, low voltage control panel separate from high voltage power module.
- Digital temperature display.
- System status, operation and fault display.
- Raised buttons to allow easier operation.
- Backup battery to keep time and set program.
- Optional flow check valve connection to safeguard against pump running dry.

### Specification

Power Supply	240 VAC 50/60Hz, Combined load 10amps MAX , 1.5m lead length
Probe Length	3 metres
Outlet GPOs	3 pins standard 10 amp maximum load
Dimensions	254 X 81 X 25mm Control Module 175 X 135 X 85mm Power Module
Top-Out Adjustment	Digital control to 40°C (conforms to AUST STD)
Installation	Sheltered position out of direct sunlight on vertical surface
Indicator LED	All functions except "OFF"
Top-Out setting	0.5°C about set Top-out temperature
Operation	ON/ OFF +5°C / +1°C nominal differential
Flow Protection	Optional with special Flow check Valve protection
Sensor Probe	Pool for positive quick connection and easy installation.
