## ROBOTIC POOL CLEANER

# ROBOTIC POOL CLEANER

## THE NEXT GENERATION

Admiral is the next generation of pool cleaner. Independent to your pool's pump and filter system, Admiral is self-driven by an internal motor.

Replicating your pool's filtration system, Admiral vacuums in water, dirt and debris via an internal pump and filters the water via its filtration system.

No installation, hoses or additional equipment is required, just turn it on and it will vacuum and clean your pool's floor within two hours. Admiral is suitable for vinyl liner, fibreglass, tile and concrete residential pools up to 6m x 12m.

## RELEASE YOUR POOL SKIMMER

Without a suction cleaner attached to your pool skimmer, it is left free to skim the top of your pool. Removing restrictions on your pool skimmer also increases the pool's turnover rate, improving water clarity.

## DIRECT DRIVE MOTOR

Admiral's Gel-pro brushes are powered by the cleaner's Direct Drive motor with increased torque and efficiency. Its Direct Drive motor allows for powerful vacuuming, pin point navigation, better traction and superior cleaning capabilities.

## ALL TERRAIN TRACTION PLUS GEL-PRO BRUSHES

Admiral has two sets of continuous traction wheels to enhance its climbing performance. Its dual Gel-pro brushes are gentle enough for vinyl liners, yet rugged enough to clean the dirtiest concrete and fibreglass pools.

## WIDE CLEANING PATH

The strategic location of its vacuum intake ports and the advanced geometry of its under belly allows debris to be vacuumed not only from under the cleaner, but also from its sides.

## SAVE TIME, WATER AND CHEMICALS

Admiral micro filters and circulates the pool water reducing filter maintenance, saving water and pool chemicals.

## ENERGY SAVING

Admiral's water-cooled pump motor represents the latest in green technology. Admiral operates on only 80 watts of power.

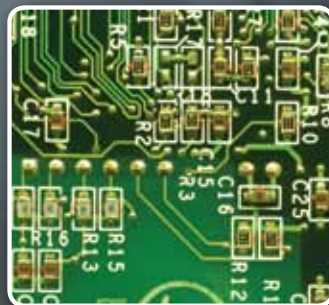

Optional caddy for convenient storage and transport.

# ADMIRAL

## LARGE INTAKE PORTS

Admiral's extra large vacuum intake ports are placed directly behind both its cleaning brushes, enabling the vacuuming of large leaves and debris.

## INTELLIGENT NAVIGATION

Admiral's navigation system prevents the cleaner from getting caught on any obstacles. Plus its intelligent programming sends the cleaner in a different direction every time, improving pool coverage.

## QUICK-DRAIN FOR EASY LIFTING

Admiral's quick-drain system allows water to rapidly flow back into the pool, immediately lightening the cleaner for quick and easy removal from the pool.

## EXTRA LARGE FILTER BAG

Admiral's filter bag is designed to maximise its capacity and micro filters down to the finest debris.

# ADMIRAL

## TECHNICAL SPECIFICATIONS

Maximum pool size	6m x 12m x 2.4m depth
Pool types	In ground pools
Pool shapes	All shapes
Motors	1 x drive motor + 1 x pump motor
Automatic shut off	2 hours
Cable	15m kink-resistant cable
Weight	3.6kg w/out transformer
Submerged weight	12.2kg
Filter volume	5.8 litres

## ELECTRICAL SPECIFICATIONS

Volts	24 volts DC
Watts	80 watts
Amps	3.48 amps

**12** MONTH  
WARRANTY

## DIMENSIONS

Length	400mm
Width	340mm
Height	240mm

Admiral Robotic Pool Cleaners are covered by a 12 month warranty. Admiral's wheels and Gel-pro brushes are excluded from the warranty.
