ROBOTIC POOL SCRUBBER CLEANER

ROBOTIC POOL SCRUBBER CLEANER

THE NEXT GENERATION

Admiral Ultra is the next generation of pool cleaner. Independent to your pool's pump and filter system, Admiral Ultra is self-driven by three internal motors.

Replicating your pool's filtration system, Admiral Ultra vacuums in water, dirt and debris via an internal pump and filters the water via its filtration system.

No installation, hoses or additional equipment is required, just turn it on and it will vacuum, scrub and clean your pool's floor and walls up to the water line in 3 hours. Admiral Ultra is suitable for vinyl liner, fibreglass, tile and concrete residential pools up to 9m x 12m.

RELEASE YOUR POOL SKIMMER

Without a suction cleaner attached to your pool skimmer, it is left free to skim the top of your pool. Removing restrictions on your pool skimmer also increases the pool's turnover rate, improving water clarity.

SAVE TIME, WATER AND CHEMICALS

Admiral Ultra micro filters and circulates the pool water reducing filter maintenance, saving water and pool chemicals.

ENERGY SAVING

Admiral Ultra's water-cooled pump motor represents the latest in green technology. Admiral Ultra operate on only 120 watts of power.

Caddy included for convenient storage and transport.

DUAL DIRECT DRIVE MOTORS

Admiral Ultra's front and rear Gel-pro brushes are both powered by the cleaner's direct drive motors with increased torque and efficiency. Its Dual Direct Drive motors allow for powerful scrubbing, pin point navigation, better traction and superior climbing capabilities.

ALL TERRAIN TRACTION PLUS GEL-PRO BRUSHES

Admiral Ultra has two sets of continuous traction wheels to enhance its climbing performance. Its dual Gel-pro brushes are gentle enough for vinyl liners, yet rugged enough to clean the dirtiest concrete and fibreglass pools.

SCRUBS THE POOL FLOOR, WALLS & STEPS

Admiral Ultra not only cleans your pool's floor, it also climbs and scrubs your pools steps and walls up to the water line.

WIDE CLEANING PATH

The strategic location of its vacuum intake ports and the advanced geometry of its under belly allows debris to be vacuumed not only from under the cleaner, but also from its sides.

ADMIRAL

ULTRA

LARGE INTAKE PORTS

Admiral Ultra's extra large vacuum intake ports are placed directly behind both its cleaning brushes, enabling the vacuuming of large leaves and debris.

INTELLIGENT NAVIGATION

Admiral Ultra's navigation system prevents the cleaner from getting caught on any obstacles. Plus its intelligent programming sends the cleaner in a different direction every time, improving pool coverage.

QUICK-DRAIN FOR EASY LIFTING

Admiral Ultra's quick-drain system allows water to rapidly flow back into the pool, immediately lightening the cleaner for quick and easy removal from the pool.

EXTRA LARGE FILTER BAG

Admiral Ultra's filter bag is designed to maximise its capacity and micro filters down to the finest debris.

TECHNICAL SPECIFICATIONS

Maximum pool size	9m x 12m x 2.6m depth
Pool types	In ground pools
Pool shapes	All shapes
Motors	2 x drive motors + 1 x pump motor
Automatic shut off	3 hours
Cable	18m kink-resistant cable
Weight	4.5kg w/out transformer
Submerged weight	20kg
Filter volume	8.1 litres

ELECTRICAL SPECIFICATIONS

Volts	24 volts DC
Watts	120 watts
Amps	5.22 amps

DIMENSIONS

Length	420mm
Width	420mm
Height	240mm

2 YEAR
WARRANTY

Admiral Ultra Robotic Pool Scrubber Cleaners are covered by a 2 year warranty. Admiral Ultra's wheels and Gel-pro brushes are excluded from the warranty.
