Multiport Valve Main Functions

- Filter** - downward flow through the filter bed to outlet
- Backwash** - upward flow through the filter bed to waste
- Rinse** - downward flow through the filter bed to waste
- Waste** - bypass the filter bed to waste
- Re-circulate** - bypass the filter bed to outlet
- Closed** - no flow to the filter

Cleansing a filter simply requires shifting the Multiport lever from the “filter” position to the “backwash” position, which reverses the flow of water in the filter, flushing the filter bed.

Warranty

Waterco Multiport valves are covered by 1 year warranty.
